ALLOWANCE

Remarks

The amendment filed by Applicant on April 25, 2008 in response to the Office action dated January 9, 2008 has been acknowledged. In the Office action dated January 9, 2008, claims 3 and 4 were objected to as being dependent upon a rejected base claim, but otherwise allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. In response, Applicant amended independent claims 1, 7 and 61, incorporating the subject matter of claims 3 and 4 into each independent claim. Currently, claims 1, 2, 7, 9, 10, 12-21, 57, 58 and 61-64 are pending.

The amendments to the Specification filed by Applicant to correct spelling and grammatical errors have been acknowledged.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76. The oath or

declaration should also identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

Allowable Subject Matter

Claims 1, 2, 7, 9, 10, 12-21, 57, 58 and 61-64 are allowed.

The following is an examiner's statement of reasons for allowance:

Berndt et al. (US 6,811,668 B1) disclose a modular microfluidic apparatus comprising a fluid manifold base coupled to a microfluidic chip. The fluid manifold base comprises a plurality of bays extending through the thickness of the base, and a plurality of reservoirs positioned within the bays. The microfluidic chip comprises a plurality of inlets and ports positioned in locations corresponding to the reservoirs. However, the apparatus disclosed by Brendt et al. do not disclose sealed reservoirs configured to be penetrated by a needle that enables fluid communication between the reservoirs and the microfluidic chip. Moreover, none of the prior art on record offers motivation to provide the apparatus disclosed by Brendt et al. with a needle/seal combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL S. HYUN whose telephone number is (571)272-8559. The examiner can normally be reached on Monday-Friday 8AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on (571)-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
